

galactic central information

the homo sapiens

and the planet of the fata morgana

a documentation

[download pdf ebook](#)

this is a documentary

.... from a visitor > from a far away galaxy >

coming to us 26 millennia ago > in his spirit only

having now incarnated in our own biology >

to be telling us the story

of his own civilization

since we are homo sapiens ...
we have of course no democracy

certainly no secret and free voting

but of course an argumentocracy
meaning ... where is the best solution
is used by all

because only the best solution
can be shaping our future for all eternity

where our universe and all worlds

are preserved to eternity

and should someone
bring forward a scientifically provable
better solution > then this will be used

of course we have no theocracy

even though it is our entire existence

to conserve this universe and all its people
so ... we live according to a religion

there is no humanity with power positions
but an alienating hierarchy

and alienation creates automatically
and principally criminal energy

which will lead to a secession
as soon as no power can prevent it
because power exertion makes it natural
to creating this cleavage

of course there is no money here
and consequently no capitalism
since this only can be the end
of every thing

we create everything that we need
so that we have everything
and of course we can keep it
for millions of years ...

prolog

on this planet ...

it is like a fata morgana !
you do not know what you even could do ...
because there is sparkling water in front of here

but actually you know >
that there is no water there !
but what else can a man do?

just to continue ...
because here at this point >
there is surely nothing to drink !

and there in front > there is no hope !
only at the end your dead by boredom ...

because this world is becoming the second venus
so only boiling water ... when ever

because there is not even
a consciousness somewhere
no dialogue or public truth

only all these thirsty
trying with their last strength
reaching the water not being ...
there!

the visitor

already from space coming
any intelligent visitor ... will see >

that this planetary population can be no homo sapiens !

just looking at the illumination of the dark side of the planet !
and this mass of radio transmissions for broadcasting entertainment

when every one should be resting !

because every human needs contemplation
otherwise he will be > becoming insane !

then ... when the visitor closing in and all this garbage to be seen
he can only turn away disgusted >

and when we are coming down on this ... "earth" then ...
every one is running from one drug of entertainment >
to the next > drug of food

or this guarding the peoples humanity >>>
with wolves > with state licensing dog tags !

or just looking at those ideas > this population has
about an extra terrestrial civilization >

no longer ... any rest period at all
just endless fun !

or the "search" of this earthlies >
for extra terrestrials ... via radio waves

then we know for sure
that this can only be simply a mass of insanity

and should more evidence of this be needed >
then we need just to look at this animal love !

when every homo sapiens is knowing >
that animals never want to live in human dignity ...

this is a very unusual superiority >
of the homo sapiens in this universe

consequently they are > the only such > long enough there >
not just to settle one galaxy

but the whole universe !

documenting a day in the life

of > first planet < in the year 154 after creation >
of the first human settlement in this universe

note a responsible life style ...
can not only be the biggest fun in the universe
but being the only life style ... working endlessly

because every one can be convinced of what he should be doing !
forever

we are looking at > first planet > at our very right >
our sun > below left > what is looking like a tiny moon
being the space ship > watching out for the safety
parked in geo stationary orbit over the settlement >
with only the sensor doors open !

we are seeing no lights on the planet be low !
no sign of any settlement ... or manufacturing >
the only thing to indicating any population as of now >
are the out rigger sail boats beached > the solar electric rovers >
the solar powered river boats

but there is an emergency plan ready
to put all those under cover should any need arise !

the camouflaged hydro electric plant at the river fall is not operating
the lights for orientation in all the housing and control centers
is being supplied by tiny local thermo nuclear power plants
from the former uses on the robot ships
and planet rovers

there is no other kind of any human population any where from here
naturally ... no broadcasting of any radio trans mission of this world
can be received at any distance !

as all communication is done > by quanta communicators >
low power short distance equipment or through under ground lines

we are now in the main command room >
the display showing >>> automatic surveillance mode on >
no space sensors > no space ships >

now asteroid on coordinates **6 39 15.70 > 2 16 22.17 >**

received quanta message from planet two >
but no frequency messages >>>

since automatic mode started !

the crew sleeping > like all residents be low on the planet

we are now going toward the first planet > seeing a robot ship >
monitoring the settlement > seeing a predator going toward it
notifying the nearest planet rover automatically at the planet surface
there the animal repulsion system is activated >
and the tiger is making a U turn and going off

we are now in a cave > at the rivers bank >
seeing two children in the dawn of the new day !
the increasing light being brought in their room
by an automated mirror from the rising sun >

the led clock showing 5 45 the date 05 03 000 154 > at this moment >
the boy is waking up and looking what time and saying aloud >
will to be getting up soon !

when his sister is opening her eyes too

now we are in the kitchen of the cave >
where the boy is telling his parents there >>>
that he does not want to go to school today >
but be playing with his friends at the river
his mom asking him >

what they are having in school today ?
and he startles

because he was to show off his experiment of mixing colors today !
so ... he thinks > he will be going to school today after all ...
to be showing off >

an electric motor
where a disk of all colors in sectors
will be becoming an off white once turning ...

the mother saying > we are having >
commanders day 100 th anniversary coming up in 3 days
then we will all be having off ...

and dancing and singing together all day long
do you remember what he has done for us ?

yes ... says the girl >
he was the founder of our religion >
he and his crew of a space ship

put the tyrant and his bandits of the empire on a planet to die ...
while having time to realize all their wrong doing ...

and settled this world for us >
free of any wrong doing

I am > because we all are !
and we can be > because I can be

what is the supreme law ?

the universe ... and any world
use only as defined by creation !

and consequently from this derive >
all commandments >

all fundamental rights from !

as well as the requirement for peace !
all must recognize the present reality
and then ... guarantee a new !
meaning an accountable life

providing for all ...

no mirage > without any delusion !
without physical force > without taboos ...
all must be addressable !
meaning capable of >

being a responsible citizen ...

then he went off in his spirit later on >
leaving his body behind here >

to be helping a native population
living after our religion in some other galaxy !
and this day we are celebrating >
what he having done for us

all their other relatives are coming in now ...
many being over a hundred years old !

they are fixing breakfast now >
from the seeds they have been collecting days ahead
and rolling them out >

soaking them since last evening
and now adding fruits and nuts to it !
after eating the kids are going off to school >
half of the adults are going collecting lunch ingredients
the others going to their work

since this being the first settlement ...
the galactic council being here

and the coordination of all the things to be done >

the council members
are considering the danger from the asteroid >
sending a robot ship to it > to making star dust out of it >
to fertilizing our planet !

the message from planet two will be considered now ...

to our dear galactic council members

as you know

*we have arrived at our new home month ago !
taking inventory of all plants and animals
pathogens and toxins ...*

*atmospheric components being confirmed ...
animal population is in a very early state !*

*having selected a location for the new settlement !
like our first> at first planet ... at a river bank
in a desert within the tropics >*

*since the sun shining less than
at first planet > we will be limiting the settlements
to the near equator ...*

*there are limited places for caves ... so >
we will later be building partially submerged housing there >
since the bank mostly does not have enough slope to it
and since there be no more need for
exclusively camouflaged housing ...*

we will be all moving into our new housing now >

*to be celebrating commanders day ...
all together on our new future planet !*

leaving the space ship two > at automatic command mode ...

*our dearest regards to all of you >
for having made this possible*

commander ss 2

the council members compose a reply and congratulations >
for the successful start of a new settlement
on the second planet ...

there while in a another galaxy >
the spirit of the commander !

still working on the evolution to a higher race >
there !

the harbor being down river >
the space craft factory being at the hydro electric plant
up the river ... right here >

many service work shops for all the technology used
note books having direct led screens ...
every pixel having one triple led
using less than 1 watt >

the rest having only 100 mhz >

and the OS being optimized

as well as all the applications for this

there is only one model for each use >
and that being build to last a 1000 years

then at 11 they all coming together again to eating lunch
under the trees by the river ...

then at 1 pm they are going
to take place at the workers who are now hunting
and collecting for diner and the next day until 5 pm

then eating together with their families ...
after they are just resting and talking things over
so no problems are unsolved ... till at about mid night >
they are having a snack

to be sleeping again till the morning

there is no hierarchy ...

because this would be an alienation
and be a coming problem for all !

everything must be transparent >
everything must be understood by all !
only in an emergency > there is a command structure >
thus > in a spaceship > at a sea crossing >
so if there is no time for talks !

but even then all orders ... spoken
about in retrospect and reviewed by all ...
to find the better answer !

just as there is no democracy or theocracy ...
since only ... if all can agree >
the answer can be right !

and only if there is no time there will be >
temporary solutions used
till a better solution is found !

and should any individual or a group
not be responsible for our universe >
not willing to be responsive ...

then this necessity
will be carried forward with all force !

while there is every freedom to act on your own >
there must be no exclusion for any one or any thing >

everything must > stay part of the creation !
because as soon as anybody is excluded
he will be feeling alienated

then arises >>> a criminal association ...

and each organized crime on a world >
even this whole universe > we will prevent !
there can be no freedom for the destruction of a people
or a world > and this is the core of our religion !

where there is no deception what so ever
only homo sapiens > knowing exactly > what they are doing >
and what effect this is having on eternity ...

> genesis <

> the emergence of the first homo sapiens in this universe

..... it happened in another galaxy
more than a billion years ago >

>>> the suspension <<<

the location > a space ship of the imperial forces on a reconnaissance flight
for a potential new colony

> the commander and his crew >> being the members of a new religion
schedule the launching of quantum communicators
for the posting of fictitious place data intended
for the imperial center through robot ships

this data adhering to the prescribed course !
as well as some quantum communicators
for fictional communications

as soon as those are on the destination
they will fake the destruction of the command spaceship

the robot ships will then return
to the mother ship on the new course >

the other quantum communicators >
have already been secretly destroyed

through the removal of the entangled quanta
in these forever

therefore it will no longer be possible
to communicate with the imperial center

today the powers of the imperial center on this spaceship>
will be disempowered and deposed on the nearby planet
only with the possibilities of primitive hunters and collectors

two robot ships will be left on this world >
to enforce the conditions >

create no signs for any one to see from space
no settlements plantings > markers
no radio or light ... fire sign development

otherwise they will be every time > be de-powered > a method
the individual lying for hours in terrible pain

until they adhere to the conditions !

they should have time>
for their gruesome slavery methods becoming conscious of !

at this meeting >
the emperor notifying to his claims >
as supreme commander and as the owner of the spaceship !

which is countered >
that everything belonging to the creator of this universe
and we are just the managers of all !

that this ship was built by millions of hours through slaves
it being on time it will perform a righteous purpose !
use it for a decent way of life in this universe

after this meeting >
there remain only the emperor and 2 of his adjutants to be deposed of
since there are some minors of the imperial center > joining
the new mission> which provides >

that the spaceship diagonally at this present course
going to a planet known only to them >
but not by the imperial center >
through

distortions made by the crew
but this region having been carefully explored >
providing ...

that the new ones are not found so easily

they could no longer stand watching
the slavery emanating from this empire
have for years thought of a way
to be sneaking a way

to live a simple and decent life in this universe!

and this priority for their future security
will from the beginning be their first priority >

they will only create underground settlements
only collect naturally growing fruits and
catches of wild fish and ... hunting

until in a different galaxy
they can be sure of not be coming prisoners of this empire again

they will only use animal paths for their movements >
but they will not keep any animals >

since this would be incompatible with their religion
because animals are no decent citizens >
friends or neighbors !

they will of course not make any lights outside in the night
and absolutely no power broadcasting of radio waves !

they will for their communications >> their energy >
use only wiring >invisible > underground

because their religion allowing no light at night any ways >
except for orientation at their home and necessary news >
no distractions > no entertainment !

should later bigger settlements
on different continents > islands of their new world ... develop
then the quantum communicators for news etc
will be equipped with new entangled quanta
thus ensuring a secure transmission

they will make the spaceship invisible by perfect camouflage
for the transition use it for their food research + health care

and then later> when new generations have been growing up >
colonize many other worlds with

to better the prospects for their survival !

this >
the story of the genesis of the modern homo sapiens
in many galaxies of this universe >

their development of the technology
for un manned colonization to other galaxies

giving ... no other race to this day > the capability to attack us
as we settle on in principle only those galaxies >
where no other technologically advanced race

and because we observe all evolution in our galaxies

long handed in advance each even the potential
of a threat to our way of life

the further development of the galactic religion >
the galactic nation and its institutions in many galaxies
and of course> the history of the emergence of the

council galactic central

being a new meaning >

because it never is telling any one any thing
or being told what so ever

but just bringing forth the best solutions
every one can be agreeing on

this is therefore a documentary > no fairy tale >
even though for a citizen of this planet >
it may be sounding like a nightmare

since their empire their paradise >
at best a ... hypocritical ... seemingly decent
and their power position in it ...

the freedom to enslave others >
their highest priority !

because for people living honorably >
responsibly is simply unacceptable for them !

the further development ...

> 10 years after <

after arriving here at our new home
we are preparing ... to live here!

by taking samples of all ... through a planet rover >
from each plant > animal > vermin > pathogen

then we create vaccines > to live healthy
without diseases ... any deficiency or poisoning !

the new planet ... a little smaller than our original
therefore everything is easier ... to realize and much easier handling ...

our new sun ... a little smaller too >
having a rest life time ... we hope almost 10 billion years
having less UV radiation ... our year is much shorter ...

but as we will be on the border of the tropics and subtropics
the plants there still having enough time to mature

and because there are always different kinds growing
some thriving in the winter time some in spring ... summer or autumn

we will be having no problems !

we explore a place on a river
the location being in a desert >

but massively fed from a remote mountain range
where on both sides everything grows in abundance !

on the steep hills on one side
we build an underground settlement in the light tuff
where already natural caves exist by erosion
we are digging further inconspicuously
from these

for our underground settlement
where every morning the sun is shining in ...
to wake up every one !

then we are working in the work shops until lunch
afterward working outdoors ... getting animals and fish
until dinner ...

as well > we are having under the protection
of the trees along the river

the laundry ... baths ... and all big workshops set up
and the big kitchen ... because there to every thing >
easier to transport to !

and there ... we as well are eating all together
afterwards only contemplation and discussions with the family

the first children of this new world are growing up
and some appropriate after their training
will then colonize other worlds !

we are using the thermo nuclear generators of the robot ships
to having energy until we build bio gas plants
where all the bio waste will get in there

for cooking and preparing hot water!
for our gas power plant ...

afterward shall the mud again be supplied back to nature
as a fertilizer!

we do not want to use hydro power for now
until we are sure > that it will not expose our existence

so far > no report from the telescope on our spaceship
meaning no imperial ships or probes

we find crude fibers to weaving ...
for fabrics and making clothes !

we build an outrigger sailboat to crossing the river ...
and trips to the nearby coast ... where grass seeds are growing
and everything other we can use !

to getting all we need for the growing population

> the end of empire <

we learn from the robot ships ... left at the exile planet >
that the emperor and his two henchmen ... are death >

and many years later> that by losing the emperors ship >
the embarrassing dis empowerment on our part ...
even the empire itself sinking into chaos >
over all those riots and sabotage >

as the empire now headless > without true knowledge ...
and character >

every one trying just to savor rulers paradise !

resources squandering > contaminating the environment>
instigating wars > destroying all >

only for the preservation of their power ...

until only a few > in miserable existence remain !
from this empire will come no danger to us ...

but we know that not ... until much later!

> the first generation <

the children thrive in this heavenly environment
we do not have the slightest problem !

we can take on any problem immediately and directly address
to find a general realization >

the education of the spaceman going ahead as well ...
only no one really ... wants to get away from here >

therefore we decide > to first develop this world more >
before some of us leave it ...

to populate some other planet !

> the commander going his way <

he has developed a way
for immaterial remote sensing > other worlds

where higher animals have already developed >
to serve for the incarnation of our religion

he predicts > that he will leave behind his body now for ever
and will go to another galaxy with out it > only his spirit
because the distance for manned flight > is much to large !

he will help the native population there in their own system
developing towards > according to our religion

saving them from going into barbaric competitions
through incarnating him self into the native population !

he informs some of us > of a means to call him
should we need him or he him self ... us >
but he can only with his spirit coming back to us >

his body we should bury after his death

.... the message

on the inter galactic frequency we receive one day
a wireless message > from a radio amateur ...
reporting of the end of the empire !

we are considering what to do ?
we could fly to another position >
to not directly betray us ...

and reply from there ...
but what could help this ?
such a sick population as this there
no man can help with words !

there is not even a possibility
our intention ... our lives to describe there !
they would not believe us even >

that there are homo sapiens in this universe!

and why would anyone want to limit itself
in its power ruling ... for to good of the future ?

if these offenders there
only just do not want to do this !

we could fly there >
and what could we do there ?

we could start a war
with these now stake holders >
could free them > of their stupidity !

but who would want this ?
we want certainly no war >
they want

only their irresponsible life !
this now crystal clear

so who then wanted to start a war ?
if not any danger

no chance of having any success ???

there is not even a real law and order there >
not any real religion for homo sapiens !

no conscience > no haze of something other ...
only endless power play ...

and when we would free those slaves
and selecting a 1000 from the general public
and then flying them here

we would have 1000 potential tyrants here >
problems for our future !

there is a treatment for those >
but since they would have to want to first being healthy >
and which a disease wants to get ... well ?

we thought that it was just >>> the emperor !
but now we know > that it is also each and every one
tacking part in this >

because ... we could have taken part in this further >
in this eternal game of the rulers paradise ...

where only the position of power decide >
how much does he savor !

how many resources squandered
how much the environment contaminated
how many people forever tortured to death!

of course ... we will not reply >
as we never send out radio waves !
which can leave our world ...

we shudder only ... if we think of all of these !

it is not just about our security >
it is about the future of this whole universe

100 years after

we have many settlements on our world
we visit with our vector fin outrigger sailboats
and deliver key parts

we build solar power freighters for inland navigation
and areas with little wind

we have at a waterfall ... far above our river
a hydro electric power plant ... installed underground >
and on the cliffs there >

a roof with vegetation on top camouflaging a factory
for our robot ships and space ship production ...

for ground transport > we build desert rovers >
with solar powered electric drive ...

of course bicycles
with direct front wheel hub drive !

we stay young through proper eating
and as well exercise every day in the sunshine ...
of course because of our satisfaction!
and because we know

to be doing the right thing

we use> the thermo nuclear generators >
from our robot ships etc > after exchange >
for a long time coming !

for example in the settlement area
where the weight factor / current output are of no concern

then after centuries using them there > the remains >
are smashed further by artificial neutron bombardment >
till these residual isotopes to becoming lead >>>
nontoxic

over the whole period of time ... the waste heat
continue to be used or the electricity produced

of course we will mine the uranium > for this to begin with >
safe > meaning underground > and with mine robots

so there will not only be no danger> created for the environment
but de facto > the radiation dose from this natural source
even be reduced in the long term

the whole production process of this thermo generators
and their reuse conversion > will of course be done with robot systems
and monitored by us via video continuously >

our pcs have ... inclusive monitor >
a power consumption of < 1 watt equivalent
because our programs are so optimized >
that they are only some mbs

and consequently only need a few mhz !

there is only one kind for any purpose
so there are spare parts and renovation for
millions of years guaranteed

our lighting fixtures have led > and by over sizing them >
therefore maximum efficiency > use only a few milli watts >
under difficult working conditions ... about one watt
and they are functioning some millions of hours

of course we apply sun radiation via mirror deflection
in our workshops > wherever possible

of course we work normally only in the day time
and our lighting is for guidance mostly
in our living places at night ...

1000 year after

we scan further along our space environment
crumble all meteors > which are dangerous to us
so they fall as star dust only

we visit for the first time our world of origin !
and film the destruction caused by endless wars
and the exploitation of resources

but never make contact with the few survivors
there because of lack of metals > are living ...>
dying like in the stone age !

we as well are also making no contact
with any vermin and predatory animals

who simply have no use for our way of life
are pure creature of instinct ...

slaves to their criminal environment !
simply atrocious ...

compared with us > where you can not even see >
that there are people living > because we save each screw >
every piece of metal and reuse every thing !

never make anything out of order
or build it just for a limited time
but for an eternity

although we seem to have no enemies anywhere
but just for the esthetics > we camouflage all technology
laying high voltage dc lines in the river

all the others ...

can be camouflaged in an emergency!

a million years after

our original world ... does not ... have any more people
on it ... because of the contamination everywhere ...
the lack of resources and foresight

and because of this hopeless stupidity
they are gone extinct ... bored to their own death

we have now settled several other worlds in our galaxy
and through immaterial mind transfer > some other galaxies
for our life as homo sapiens

there are no wars > no contamination >
no hunger in our civilization any where
because all ... are part of every thing ...
all have the possibility

within the line of the universe
to realize all we want

we show our videos ... of our former world
in social political ... and religious lessons !

and no one can believe it >
that there is such a mentally handicapped population possible !

we exchange ideas via mental visits with the other galaxies
as well our former commander

being the beginning of the council galactic central
as well the beginning of the galactic nation existing already !
we continuously contact all via quantum communicators ...

the galactic religion ... the essence of our life > perfected
seeing any risk for our intelligent life ... long ahead
having an answer for everything !

everyone can be helping to perfect ...
we all want to live in a paradise for all ...

where there are no victims > no perpetrators >
no shame > no conceit all true and real

paradise every where !

one billion years later

we are represented in many galaxies >
by mental transfer

through the incarnation in advanced animal bodies !

and over all this time to have our idea
endlessly proven ... the homo sapiens race !

only there was ... just mean idiot selection
created by such a stupid idea > as this world here

where one idiot with the other competing >
to all these idiots delight ... in their insanity >
the great stupidity their mass of enslavement !

creating meaningless jobs !
see house hold delivery of toxins !
people being driven to freak out!
to preventing any solutions !

see this planet satan here

the further development of the galactic religion

we having been thinking all these years about ...
how we could protect our way of life against any destruction ...
so we develop our religion further >

what is the supreme law ?

the universe ... and any world
use only as defined by creation !

and consequently from this derive >
all commandments >

all fundamental rights from!

as well as the requirement for peace !
all must recognize the present reality
and then ... guarantee a new !
meaning an accountable life
providing for all ...

no mirage > without conceit !
without physical force > without taboos ...
all must be addressable !
meaning capable of >

being a responsible citizen ...

> galactic central <

we are creating an information institute
where all knowledge is collected > organized and analysed

> galactic nation <

is there for all homo sapiens
in all intelligent nations of this universe

> council galactic central <

after many worlds in other galaxies having been inhabited by us
we develop an institution >

where always some of us in their galactic neighborhood
are chosen to visit by immaterial exchange and keeping
the connection to all of us !

receiving information for all proposals and provide expert opinions
for the improvement of all on going ... but never telling any thing
or being told only information to being used if accepted by all ...

galactic foundation

we are the guardians of creation

the homo sapiens ...

being the basis of our civilization
for our success in eternity

with his never ending wisdom > his total responsibility
where no one ... no idea ... no solution will be shunned >
no resource being wasted > no environment being spoiled >
no security measure left out

where there is no hierarchy >
because every one is the most important being !
at our never ending paradise on any world
in this universe

we at the galactic foundation > are searching constantly
finding any and all danger to our society
coming from degeneration and pest

keeping every homo sapiens informed >
what a difference they are making !

there while any and all danger to our universe
will be eliminated through >

our galactic pest control program ...

the universe ... can not be an organized crime >
with its technology > its predatory instinct
on every world > every galaxy >

yes ... in the whole universe

so ... may not hold people from a responsible way of life
since this is without responsibility
since those organized criminals

understanding only their animal instinkt ...

the law of the universe >

each one citizen can only use his world
for a purpose of the universe > for creation !
and not for the destruction of their worlds
and certainly not for the destruction
of all responsible life ...

every little child knowing this in our society !
and everyone can understand it >>>

because they are having a comprehension ...

fellow humans ... should therefore their fellow human >

to be an inspiration and not an inspiration for this >

end to your world > but to be keeping it as long as possible

> meanwhile > all people are so healthy

and always living healthier!

always freed from any danger

doing less and less for their material needs

not this one day throwing away production

not these hamster wheels >

with those migratory locusts economies

the end of your world and the end of all intelligent life

already achieved

a technology may only serve the people

not for his enslavement > not to being terrified to his end
not as a drug > because he's not able to stand this reality
can not bear at all > can not stand

not as a conceit > he would be a success >

not as a distraction > from reality

but we need homo sapiens > no idiots selection

for a secure future > for a future at all

so we need the education to a homo sapiens

not to a suicide assassin > these all are

because there is no fundamental difference

between any Islamic state > and his religion

or such a satanic state > who puts his delusion through

no difference between such a terrorist president

or such a freak out > who seeing no other choice

as just to be shooting around > just like all of them

terror states always are killing all resistance !

just to not grasp > that this whole world being the problem >
and no one has a solution!

nobody wanting a solution ...

the individual ...

can not be let to enjoying his idiotic egoism

at the expense of the environment and its fellow human beings

nor can he be enslaved > to a mass of insane >

to let their masses enjoy idiotic egoism

to destroying their world and destroying the people

to this horrible reality today

the only possibility for a sustainable world

and a society worthy of its people

to an endlessly functioning environment

an endlessly functioning society

be ... that all first

to recognize the need of a valid order!

and implement this > that all >

endless with one another in an open dialogue

every day > always discussing the reality anew

where everyone has a voice > not just the mass >

meaning a majority of insane

as now!

and consequently use this public truth

as a basis for your all decisions made

to realize a real righteous state

to fulfill all valid laws

to living a valid religion

homo sapiens?

only harm can come from them!
to the climate > the resources >
the seas > the land and the future !

of course to every homo sapiens > who knows
that all this harm to his world will end it ...

the meaning of a human life >

is to work out a decent way of life
realize it > live it > guarantee it for all !

because only then is he a human being !

and therefore there is no meaning here on this world !
as there is no humane order

because humans only want to live decently
can be > must be!

otherwise they will be dissatisfied with themselves >
until they can live as humans !

so to achieve this >

the meaning in life of each person
is to make just this happen !

until then ... they feel like losers >
indeed they are in reality!

only by their conceit procurement >
this is represented as a success >

eves insane aspiration of the true love

thus ... the person she will select > being as in any animal tribe >
to spoil her immeasurably this existing for millions of years
and until 100 years ago ... this was just inhumane !

but today this being the big animal love ...
straight to be the problem ... because eve still >
will marry the great pamperers ... materially and or psychologically >

a homo sapiens having not the slightest chance !
only these clever critters trained by her

eve ... was and be never so generally suppressed !
but in a stone age society > roughly equivalent with adam

but in this western version > where eve can sit around
and wait until her requirements of this insane love is full filled >

guarded by a so inhumanity as this insane western society >
where useless work being created and trained animals > state licensed >

she be the absolute ruler > the tyrant over life and death !
since she needs no man > biologically speaking emotionally
but man be entirely dependent on eve

else nothing will come of him > even with a pope >
he adores ... yes > must worship mother mary !!!
otherwise he would never becoming a Pope

of course there are exceptions >
of any outbursts over all this injustice !
so if a man to lock her in the cellar

or he makes his exploitation >
to have access to a biological necessity !
he never could work out under humane conditions ...

so eve be with her animal demands >
and no responsibility for the future or humans
be the cause of this worlds dying

and as long as this insanity of the suppression of eve >
being perpetuated in a single nation ... for selfish motives >

for men the world to be put to their death >>>

as long as there will be no rescue for this world
consequently ... we need of course eves great friend >

the trained predator >
discarded from all areas of human society !
because children growing up with predators >
will be just idiotic offenders

they of course to make no future !

just homo sapiens > the now soooo oppressed
being capable to work on a solution >
to realize this worlds rescue

but those in fact can not exist !

how is an eve supposed ?

to care for something other
then savor heir satanic symbiosis fully !
if no one will constrain her > such as a religion >
a tradition > a society!

while in this country they are so glorified by all >
because they too are just a mentally retarded choice !
from this it follows ... a mentally retarded world

how is some adam ?
care for something other then to savor his satanic symbiosis
if no one here to force him other wise >
such as a religion > a tradition > a society !

while in this country he is so glorified by all >
because they too are a mentally impaired choice !
from this we follow a mentally retarded world

how is a free market economy to function ?
if they may only build rummage > going of next week in the garbage
while the climate being flipped > squandering the resources >
environmentally damaging ...

otherwise they will not selling long any thing !

how is there supposed to be justice ???
in such a satanic world

and how should this pest allow ... any homo sapiens ?
if they can not be in a position to >

even knowing > what was right or wrong

as soon as the individual

themselves are out of bounds of the general future design
for example ... because they want to hide their criminal intentions
meaning ... this idiot selfishness to further savor just this
or any individual > the responsible > being excluded !

can this be no humanity >
but a criminal association !

because only when all have part in it

and most importantly ... may be part of this >

can this be righteous and consequently an honorable society !
and the honor of every one must always be the first priority

thus we need all to be heard >
observe all valid arguments >>>

and on this basis meaning this compiled ... public reality >
make our decisions > our future design !

otherwise this is not a rule of law
but a criminal association ... as usual
this will not be functioning long

see as well the 11th commandment of the galactic religion !

and only having a decent ... honorable future design a true living together
can prevent disasters > since they take into account all the reality >

where as any criminal association > meaning all of them now >
end necessarily > because of all these disasters they are creating >
because they have not ... the reality as their counselor !
but their fata morgana where no water awaiting
though their equally insane >
delusion procurement !

homo sapiens ?

it is not ... that those masses are insane >
so actually the opposite of rational !

but all of them ? competingly criminal
which should be condemned by every law authority !

since they are all ? a general danger to this world > since inhumane !
condemning each other to state forced labor >

forcing each other to drug selling > toxins > narcotics >
and buying those ! in absence of any thing else to do >

entertainment >>> artificial > visual and hot sounds !
for the distraction of this gruesome reality

traveling to other mass delusional centers !
or the really big delusional freedom >

the patient nature and their " loving " animals !
the certified freedom from a humanity

life should be about human dignity !

about an intelligent life ...

because only if every one is being treated as an intelligent human
can there be a human civilization long enough to even blink your eye

so ... life should not be a game at ever higher levels
should not be about > making out of pawns > big players !
that is simply absurd ...

because the planetary resources will not be there long enough
for even a million years !

nor the very environment !
nor an intelligent population ...

because players will not be responsible citizens !
because their endeavor having just not this very important >
basic ingredient in there !

so we need no highly educated players !

we need responsible entities ... and their capabilities are then used >
for the security ... the human dignity of all for a billion years !

on this planet > and for eternity on other worlds ... in other universa

so ... all power emanating from the government should be about >
to guarding human dignity

or every thing will be over in a 100 years !
its clear to see for any homo sapiens ...

epilog

this population must becoming sane or disposed of!
there is no alternative for the universe ...

so free and secret majority voting
must be abolished

and publicly argued on an internet forum
for solutions where everyone can participate >
where everyone to put forward a better argument >
to one for all binding solution present > no mass delusion!

because the majority is always wrong >

and only a few right and we need a solution >
we need an argumentocracy!

can some one suggest a better argument ?
for a responsible life ...

and only a responsible life
can save this world > no mass delusion !
is this clear to all ?

because democracy was already wrong
according to some of the ancient greeks !

so it must be made public > that women are not suppressed
but the cause of all problems > meaning the problem !

because she only dreams of the destruction of all higher life

so we need the education to being homo sapiens !
so a galactic university > showing the solutions
